

REMARKS/ARGUMENTS

Applicant respectfully submits this amendment to change the title of the Application under 37 CFR 1.312. The change in title from "Lightweight Prosthesis" to "Light Prosthesis" merely embodies the correction of formal matters without changing the scope of the claims. In addition, Applicant noted that the title was filed correctly with "Light Prosthesis" when entering the 371 phase, but the Office apparently transferred the title directly from the PCT Application, which was entitled, "Lightweight Prosthesis."

Applicant understands that no amendment may be made as a matter of right in an Application after the mailing of the Notice of Allowance, and any amendment filed pursuant to 37 CFR 1.312 must be filed before or with the payment of the issue fee, and may be entered on the recommendation of the primary examiner, approved by the Director, without withdrawing the application from issue.

Applicant respectfully requests the speedy approval of the change. The Examiner is invited to contact the undersigned with any questions, comments or suggestions relating to the referenced patent application.

Dated this April 8, 2008.

Respectfully submitted,
